

WORKMASTER®
WE FIND A WAY — OR MAKE ONE!

THE PERFECT POUR
WE'VE GOT A HANDLE ON THAT

Not since the shift from metal to plastic has there been any reason to change to a better utility bucket – much less a safety reason! But all that's changed now that the bucket design has evolved. We have "Broken the Mold" (so to speak) with this revolutionary, patented Bucket design.

The WORKMASTER® IPM Bucket has accomplished what bucket users have always wanted: a handgrip on the bottom of the 5-gal pail. Adding this molded-in grip is a game-changing feature that greatly improves worker convenience, efficiency, and safety on any job. And not only does this one-piece, user friendly bucket work in any application currently using plastic buckets, but it's also cost competitive with the unwieldy 5-gallon plastic bucket you currently use.

The WORKMASTER® IPM Bucket can be used safely to store - and pour - paints, inks, chemicals, foods, construction materials, ice, pet foods and a range of other applications in industrial, agricultural, pharmaceutical, construction and commercial applications.

The WORKMASTER® IPM Bucket meets or exceeds every typical industry standard. It's made of high-density polyethylene (HDPE) and has a full 5-gallon capacity. The grey plastic pail has an HD 90-mil wall thickness, reinforcing ribs for shape retention, and metal handle with plastic grip. Both the grey pail, metal handle, and its black cover lid are 100% recyclable and rated UN # 1H2/Y1.2/20/16. The black traditional press-on lid is sold separately.

STACKS/NESTS NEATLY

BUILT-IN GRIP!

By adding a rigid, integrated handgrip at the bottom of the WORKMASTER® IPM Bucket, the risk of spills and other inefficiencies are reduced, and worker injury is all but eliminated. This patented design offers something no other bucket can...The Perfect Pour.
